Team Newsletter

September 12, 2017

Welcome Back

The team leadership would like to welcome every member of the team back to what we know will become a greatly successful robotics year for Team 6643. To begin the year, we will be adding several new practices to the team. There will now be a monthly to bimonthly newsletter to all team members containing general information and updates.

Hey Team!

This coming year is going to be our best year yet! (Even though it's only our second.) Both Morgan and I are excited to announce to you lots of improvements

to the team. We will have many different community projects, team building, more organization, and a better grasp to the competition. We look forward to building a team that not only goes to the competition, but seriously competes. If you haven't already, please join the team Remind, and stay tuned for upcoming events!

I look forward to working with all of you, and having a great year!

Nolan Tremelling

Team Captain

General Updates

It's the beginning of an exciting new year for Team 6643!

Our team leadership members have been working harder than ever over the summer on new projects for the team. This gives us the most fluent transition back into the school year possible.

Records department has been working on a new series of forms for documentation and requests of all types. All forms and the form key is available for viewing in the shared Google Drive folder *Robotics*. Find it in your *Shared With Me* folder.

Communications department has been working on a new sub team standard operating procedure for members of its committees and subcommittees. The SOP will be available for viewing for communications members through Google Drive.

The new version of the standard operating procedure is available for reference through the shared Google Drive folder *Robotics*. Find it in your *Shared With Me* folder.

Safety department will be implementing a new tiered system to control tool usage safety throughout the next few months. New safety training will also be mandatory for all members of the team; more information will be available at a later date.

The Scouting Committee has been working on developing an app for the 2017-18 season, which will allow for strategizing at the competition.

A new member has joined the team this month; please welcome Jacob Spotts (Grade 9) to the Communications Department as our Media Acquisitions Officer.

Individual updates from each department should be available from your department director.

Recent/Upcoming Meetings

9.12.17 - Our kickoff meeting was held during home group. We discussed our team's agenda for 2017-2018, and reviewed committee memberships.

9.12.17 - A committee captain meeting was held to vote on the adoption of a new Standard Operating Procedure during lunch.

No other upcoming meetings.

More information is always available on our website: team6634.org

This newsletter intended exclusively for circulation within Walden III FIRST Robotics Team 6643 among members for the purposes of spreading general information.
